# ROB BAUER

Rob Bauer is the Engineering Manager of ZQuip, a growth and innovation business within Moog Inc. Moog is a worldwide leader in the design, manufacturing, and integration of precision control components and systems.

Rob drives product design with a focus on solving end user problems through innovative and an agile approach to engineering. Within his role, Rob is responsible for an agile, diverse and energetic team of cross-functional engineers that combine their talents to solve customer problems with innovative solutions.

Before his current position with ZQuip, Rob gained twenty-six years of experience with Moog Inc, in the manufacture, assembly, test and integration of components and subsystems for launch vehicles, spacecraft, missiles and high-performance actuation systems. For nearly a decade before joining Moog Inc., Rob owned and operated a residential construction business while remaining active in construction throughout his entire tenure at MOOG.
